Summary

3D Miniature of Rome Italy created with OSM data

World & Scans > Architecture & Urbanism

Tags: 3d frame mini terrain diy miniature model map rome city europe geography italy eu cityscape colosseum

3d miniature of Rome, Italy!

Model created in Blender using the Blosm addon.

Check out my collection of other miniature cities: https://www.printables.com/@jarvisar_1334825/collections/1124416

Framing Details

This model measures almost exactly **6.8in by 4.8in** (170.5mm X 119.5mm) and should fit most 5x7 frames (assuming frame lip/overlap is around a quarter inch). Feel free to change the scale/size of the model(s) to meet your needs.

Personally I use these cheap frames from Amazon: **https://www.amazon.com/dp/B0C8HY7YSQ**

And blue printer paper: **https://www.amazon.com/dp/B00006IDQT**

I also included a fully printable frame (including a 1mm thick water plate) designed to fit all my miniature cities.

A frame is not required! This model looks great by itself and can be displayed almost anywhere.
