.

.

In all seriousness, just a simple 2 part coaster in the style of the Black Mesa Research Facility from Half Life and Black Mesa. Even printed in standard PLA it's able to stand up to hot cups with minimal deformation, and if printed with Archimedean Chords any deformation easily blends in.

There are two versions of the base, one solid and one with a pusher hole for hot swapping contaminated inserts.

I would advise against printing with the top face on the build plate as it will significantly reduce the grip the coaster has on mugs and glasses.
