This easy-to-print model is for a silhouette of a Peering Cat with 3 different models for various display techniques that requires no print supports. The Silhouette can be placed on a shelf, placed in a window, screwed to the top of a fence, or where ever your creative mind desires. The models print at 8.75 inches / 222 mm wide. If can be scaled smaller or larger in your slicer. If larger you may need to rotate in order to fit on your print plate. I recommend a 0.16 mm or 0.2mm layer height, 15% infill, low top and bottom surface count, and top surface ironing however none of these parameters are critical..

Model files

catsilh2.stl

⬚ Intended ofr shelf display

catsilh1.stl

⬚ Intended for screwing to top of fence or taped to window seal or self edge

catsilh3.stl

⬚ Gives extra support for shelve display or screwing to wood
