Here we have a remix of zykovkristian's model of a V8 Business Card holder. I made some changes to make it easier to print (crankshaft alley removed, oil pan bores removed, crankshaft bores reduced, details in the head minimized, map slot deepened). Now it's much easier to print with almost the same look. Thanks to Kristian for this great model.

<https://www.thingiverse.com/thing:2670512>

My setting:

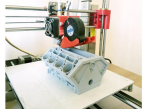

Layer height: 0.2mm - 1st layer height 0.20-0.25 - Extrusion width: 0.4mm, forced - Infill percentage: 18% - Infill type: gyroid - Wall count: 4 - Solid top/bottom layers: 5 - Supports: NONE - Material: ABS/ABS+/ASA/PLA/PA/PC - Scalable
