updated 18. 4. 2024 | published 18. 4. 2024

### Summary

Added a triangular barbs to the interior of the hooks to keep the bags from flying away.

Robert's simple, elegant design just needed a little tweak to keep my recycled plastic shopping bags from getting sucked out the window when I accidentally open it too far. My fix is a less-than-elegant TinkerCAD booger weld job.
