Hello,

this is a holder for 4 micro sd cards and one normal sd card (or an adapter).

It is the size of a credit card (85.5 x 54 x 2.3 mm), therefore it fits easily in your wallet. This way you always have your data with you.

The holder has a cover to protect the cards a bit, it snaps into place when closed.

Please leave a comment or shoot me a message if you like the holder or have any ideas how it could or should be improved. Thank you! :-)

If it does not work for you please leave a comment or shoot me a message instead of just posting a 1 star review, I'm sure there is no problem that can't be solved.

Update: I also made a Version for 6 micro sd cards and a normal one.
