UPDATE Added v2 (RECOMMENDED)

Changelog

- Easier to tighten.
- Accommodates:
 - Standard ADXL345.
 - **BTT ADXL345/S2DW** (see [this make](#)).
- 3 versions of the mount (see filenames for explanations).
- The bed spacer now plugs into the mount.

BOM

- 4 x M3 x D4.6mm x L5.0mm heat set inserts. Anything \leq L5.0mm will be fine, however.

- 2 x M3 x L6.0mm bolt.
- 2 x M3 x L16.0mm bolt.

Print Settings

- Print without supports.
- 40%
- 4 walls
- 5 bottom and top layers

Notes

- The **bed_spacer** is only needed when attaching the ADXL mount to the bed.
- I'm using the version that requires tapping of the holes.

Sources

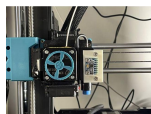

All the parts are made from scratch, however, I was inspired by [this model](#).
