Summary

Mount a webcam on your Sovol SV06 Plus

[3D Printers](#) > [Accessories](#)

Tags: [sv06plus](#) [sovol](#)

I could not find a mount i liked for my printer so i made a universal (web)cam mount for the sovol SV06 Plus.

Maybe it will also fit on the SV06??

It's a remix from another model and i put in an extra joint to have some left to right movement not only up and down.

This one can be mounted without screws on the printer on the left or right side rail wherever you want.

The small platform where you can put a webcam on is without any holes, you can drill or make whatever you need to put a screw through it or just use double sided tape.

Print with support touching buildplate for the extra joint, i printed it in PLA from Sovol

Show your pictures if you printed one and a like will be appreciated...

This remix is based on

Sovol SV06 - Pi Camera Module 3 Rail Mount + Case
