**Update 2/8/2023 New style :**

Knob - Solid v2 / Standard Knob - Auto Ford small letter / Standard Knob - Auto Ford big letter.

This is replacement for the extractor motor knob, it works for Sovol SV06.

It will continue update, if I see something interesting I will make one and share with your guys here.

I have tested it fits, so if you have problem with clearance, its your machine. If you needs help to revised it, leave it on the comment nicely, I will change design for you. If you have any problem, feel free to leve comment.

If you have any thing special that really want to put on it, leave on the comment, If I have time, I will do design for you and update on here and won't cost your anything, but my time. So again, be nice with the comment.

I have some standard knob for you if you would like to put your own staff on it. You just need to import to your CAD software and change on the center part and no need to consider about fitting clearances.

I try to make it easy to print, so every correctly tuned printer could get the job done.
