updated 20. 10. 2023 | published 20. 10. 2023

Summary

This is a Multi-color version of the print-in-place Collapsing Katana with a single edged curved blade.

[Toys & Games](#) > [Other Toys & Games](#)

This katana prints complete all as one piece, the files are split for multiple color printing with a AMS or MMU.

The **Replaceable Blade** Multi-Color version is available to my Clubs members.

Supports are not required, for best results use a .4mm nozzle. Find detailed instructions on how to print collapsing swords on my [website](#). If this is your first time printing, I would suggest you try the **test print** first. If you have issues printing, consider the replaceable blade version. It allows you to print the blades separately in vase mode.

Printed on the **Mulcore** Core-XY 3D Printer.

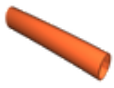

(pictures are of the dual extruder replaceable blade version)

Support and Licensing

If you would like to help support more free models or get permission to sell physical copies of my models, consider joining my **Clubs** Membership.

Do not repost, distribute, sell or trade the files or physical models of this object.
