I'm a big fan of the "dumpster fire" theme. So being able to have a functioning dumpster on my desk is fun.

On my work desk, I find it handy to stash thumb drives, yubikeys, lip balm, pencils, etc.

Right next to my printer, I find it handy to throw used alcohol prep pad wipes, scrap plastic from skirts/brims, etc.

The photos above are PLA, 0.4mm nozzle, 0.2 mm layer height, no supports.

The lids can be secured to the body with really long M3 screws (M3x50), or (my choice) 10 gauge/2.5mm aluminum wire - or any kind of stiff-ish straight wire you might have laying around.

- 10 Gauge Aluminum wire: <https://a.co/d/2aUrULR>
