## Summary

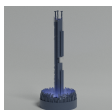

Thought this would be a cool project

[Costumes & Accessories](#) > [Props](#)

Tags: [tower](#) [citadel](#) [half](#) [life](#) [halflife](#) [hl2](#)

I found a model of the citadel from HL2 and scaled up the model 600%. When fully built, it's ~2 meters. This will take a few spools to make, but in the end it's very cool. Build order is by the letter at the end of the model name, so A is the bottom and H is the top.
