Summary

Remix to clear 5015 ducted nozzle fans for the SV06 (and possibly SV06+ but I don't have one).

[3D Printers](#) > [Other Printer Parts & Upgrades](#)

Tags: [heatbedcableholder](#) [sv06](#) [sv06sovol](#) [sv06plus](#)

I love the [5015 fan duct from @ScatteredCollectable](#).

I also love the [Sovol SV06 Heat Bed Cable Support from @bulbasaur0](#) because (unless I'm missing something) it installs hella easier using zip ties instead of bolting to the heat bed plug mount.

However - the cable support for the heat bed interfered with the duct, so I angled it down a bit in a very quick/dirty way. See pics for clearances and install.

Printed with Duramic 3D PLA Plus low-quality (0.28mm) with no supports. Works great!

This remix is based on

Sovol SV06 Plus Heat Bed Cable Support Bundle for tight spaces (now V2!)
