SV06 Plus Front Camera Mount

Modified the Original to Fit the SV06 Plus. I thank “**azlum**” for his original design.

Only the Front Plate part included. Use the original risers from the original model.

- **SV06 Front Cam Mount - Top.stl**
- **Top Bracket - Revised.stl**

For the base, 2 Versions are posted.

- SV06+ Front Cam Mount - Base-Hack
- SV06+ Front Cam Mount - Base

I made the “Hack” first to be sure of the clearances. It has the bottom Holes cut out to allow for the larger plate. The second fixes that issue, and should be more secure.

To attach the camera to the mount I use the **Camera Bolt Holder-v3.stl** or the **Cam-Bolt-Holder-M6.stl** from my **Updated Generic Camera Mount for SV06 & SV06+**.

Additional Need Hardware

- 4 - M4 x 18 Screws (Socket or Button Head)
- 2 - M3 x 8 Screws Socket Head
- 1 - 1/4" x 3/4" Stainless Steel Hex Bolt
 - or
- 1 - M6-1.0 x 20 mm Hex Bolt
