

**The most simple
credit-card sized
phone stand - less
than 5g of filament
- very stable with 2
viewing angles
choice**

No more fiddling with resting your phone against random objects when bored on a flight of cafe after realizing you don't have a phone stand with you.

Credit-card sized and ultra-thin to fit in any wallet.

This version can hold the phone both in landscape and portrait mode.

Works also in PLA.

For perfect fit, measure your phone thickness and print the size closest to your phone.

This greatly improves stability and assures the perfect viewing angle choices of 65 and 52 degrees.

STEP file included, feel free to remix and share, but please use the attribution feature.

This remix is based on

Ultra-thin credit-card sized phone stand (print-in-place). Only 5g of filament!
